For those interested there will be the chance for a meal at Cross Keys Tavern afterwards
(meal at own cost)

LASERBOND

Since 1992 we have pursued a vision of increasing component performance and extending plant and machinery life through the research, development and application of advanced surface engineering technologies.

Capital-intensive industries rely on plant and equipment performing at peak efficiency for the longest possible period to maximise productivity. Our capabilities incorporate a unique range of advanced surface-engineering technologies and services designed to enhance the life and performance of machinery, equipment and production-vital components. LaserBond's facilities in Sydney and Adelaide offer a wide range of in-house specialised service capabilities to enable large and complex projects to be completed quickly and reliably.
