

Materials and Maintenance Advancements in the South West 2020

Bunbury, Thursday 22 October 2020

Koombana Drive,
Bunbury,
Western Australia

Call for Papers

Following the great success of our inaugural MAMAS Event in Bunbury in 2018, Materials Australia is excited to invite you to the second MAMAS seminar on the latest advancements in materials and maintenance advancements for mining, processing, infrastructure, agriculture and asset management to be held in Bunbury. The seminar date will be in late October 2020 on the provisional date 22/10/20.

The innovative use of materials and maintenance to support life extension on capital equipment, infrastructure and plant assets is critical to the South West region. These industries require constant advancements in design, technologies and products to support safe, reliable, and cost efficient operations as plant and infrastructure approach the twilight years of their intended producing life.

The seminar goal is to achieve a mix of high-quality presentations, which will provide delegates an insight into the innovative developments or trends at this critical time in these industries. As shown last time, the seminar will provide industry representatives, OEM's and other key suppliers the opportunity to showcase their skills and knowledge.

Papers

We invite you to submit a short abstract for consideration. Please forward your abstract submission to Paul Howard at paulh@gerard-daniels.com

Abstracts will be required by 30th May 2020. If accepted, your presentation will be required by 8th September 2020. Guidelines will be issued for paper and slide formats. A technical paper can be submitted but we will also accept a copy of the power point presentation slides for inclusion in the proceedings.

Sponsorship/Industry Displays

A number of sponsorship packages will be available. There will also be opportunities for sponsors to reserve space to exhibit their products and technologies.

We look forward to your participation.

Yours sincerely

Paul Howard
Seminar Convenor and Chairman
